INDEX

ABRAMOWITZ, A. A., AND R. K. ABRAMOWITZ. On the specificity and related properties of the crustacean chromatophorotropic hormone, 278.

Achromatic figure, origin and development, 41.

Ammonia, distribution in waters of Gulf of Maine, 83.

Amoeba proteus (Leidy), contractile vacuole, 306.

BACTERIA, adsorption of, by marine bottom, 56.

BARNES, T. CUNLIFFE. Experiments on Ligia in Bermuda. V. Further effects of salts and of heavy sea water, 108.

BARTH, L. G. Quantitative studies of the factors governing the rate of regeneration in Tubularia, 155.

Bilaterality, Chaetopterus egg, and entrance point of spermatozoön, 401.

BRACHET, JEAN. The oxygen consumption of artificially activated and fertilized Chaetopterus eggs, 93.

CALCIUM ions, effect on volume changes in Amoeba proteus, 297.

CHACE, F. A., JR. *See* Welsh and Chace, 364.

Chaetopterus egg, dorso-ventral pre-organization of, 395.

——, ——, oxygen consumption of, when artificially activated and fertilized, 93.

—— ——, relation between entrance point of spermatozoön and bilaterality of, 401.

Chromatophorotropic hormone in crustaceans, specificity of, 278.

CLAFF, C. LLOYD. *See* Kidder and Claff, 178.

Cleavage, effects of ultra-violet radiation of λ 2537A, in sea-urchin eggs, 330.

——, in females and haploid males in Melittobia chalybii Ashmead, 256.

CLEVELAND, L. R. Longitudinal and transverse division in two closely related flagellates, 1.

——, —— ——. Origin and development of the achromatic figure, 41.

COE, W. R. Primary sexual phases in the oviparous oyster (Ostrea virginica), 64.

Colpoda cucullus, cytological investigations, 178.

Contractile vacuole in Amoeba proteus (Leidy), 306.

Cyclothone, kidney in, 349.

Cytology of Colpoda cucullus, 178.

DIFFERENTIATION, energetics of, 99.

Diploids from unfertilized eggs in Habrobracon, 247.

Division, longitudinal and transverse, in two closely related flagellates, 1.

DOUDOROFF, P. *See* Sumner and Doudoroff, 403.

Drosophila pseudoobscura, duration of life without food, 314.

EMBRYOLOGY, Chaetopterus egg, entrance point of spermatozoön and bilaterality of, 401.

——, chemical, relation of fat changes to, in sea urchin, 267.

——, dorso-ventral pre-organization of Chaetopterus egg, 395.

Embryonic determination, in Sabellaria vulgaris, 198, 211.

Endomixis, delayed occurrence and total omission of, in selected lines of Paramecium aurelia, 76.

——, effect of shorter than normal interendomictic intervals on mortality after, 244.

——, mortality after, related to prior interendomictic interval in Paramecium aurelia, 235.

Eyes of deep-sea crustaceans, Sergestidae, 364.

FAT changes, relation to general chemical embryology of sea urchin, 267.

Flagellates, longitudinal and transverse division in two closely related species, 1.
Food, duration of life without, in Drosophila pseudoobscura, 314.
FOWLER, COLEEN. *See* Mast and Fowler, 297.

GALTSOFF, PAUL S. Physiology of reproduction of Ostrea virginica, I, 461.
Gametogenesis in females and haploid males, Melittobia chalybii Ashmead, 256.
GELBER, JULIUS. The effect of shorter than normal interendomictic intervals on mortality after endomixis in Paramecium aurelia, 244.
GIESE, ARTHUR C. The effects of ultraviolet radiation of λ 2537A upon cleavage of sea-urchin eggs, 330.
Gulf of Maine, distribution of ammonia in, 83.

HABROBRACON, diploids from unfertilized eggs, 247.
——, sperm inactivation by x-radiation, 253.
HAYES, FREDERICK RONALD. The relation of fat changes to the general chemical embryology of the sea urchin, 267.
Histology of retractor muscles of Thyone briareus Lesueur, 342.
Hormone, chromatophorotropic, in crustaceans, specificity of, 278.
HOROWITZ, N. H. *See* Tyler and Horowitz, 99.

INACTIVATION of sperm by x-radiation in Habrobracon, 253.
Intermediate-winged aphids and time-of-determination theory, 430.

KEYS, ANCEL B. *See* Redfield and Keys, 83.
KIDDER, GEORGE W., AND C. LLOYD CLAFF. Cytological investigations of Colpoda cucullus, 178.
Kidney, teleost, in genus Cyclothone, 349.

LEAVITT, BENJAMIN B. The quantitative vertical distribution of macrozoöplankton in the Atlantic Ocean basin, 376.
Levinseniella cruzi, life history of, 319.
Ligia, effects of salts and heavy sea water, 108.
LILLELAND, OLE. Duration of life without food in Drosophila pseudoobscura, 314.

MACROZOÖPLANKTON, quantitative vertical distribution in Atlantic Ocean basin, 376.
MAST, S. O. The contractile vacuole in Amoeba proteus (Leidy), 306.
——, —— ——, AND COLEEN FOWLER. The effect of sodium, potassium and calcium ions on changes in volume of Amoeba proteus, 297.
MAXWELL, JANE. Inactivation of sperm by x-radiation in Habrobracon, 253.
Melittobia chalybii Ashmead, sex ratio in, 256.
MORGAN, T. H. A reconsideration of the evidence concerning a dorsoventral pre-organization of the egg of Chaetopterus, 395.
MORGAN, T. H., AND ALBERT TYLER. The relation between entrance point of the spermatozoön and bilaterality of the egg of Chaetopterus, 401.

NOVIKOFF, ALEX B. Embryonic determination in the annelid, Sabellaria vulgaris, I, II, 198, 211.

OLSON, MAGNUS. The histology of the retractor muscles of Thyone briareus Lesueur, 342.
Ostrea virginica, physiology of reproduction, 461.
—— ——, primary sexual phases in, 64.
OWEN, BRADFORD B. A simple teleost kidney in the genus Cyclothone, 349.
Oxygen consumption, in artificially activated and fertilized Chaetopterus eggs, 93.
Oyster, physiology of reproduction in, 461.
——, primary sexual phases in, oviparous, 64.

PARAMECIUM aurelia, delay in and omission of endomixis in, 76.
—— ——, effect of interendomictic intervals on mortality after endomixis, 244.
—— ——, mortality after endomixis, related to prior interendomictic interval in, 235.

PIERSON, BERNICE F. The relation of mortality after endomixis to the prior interendomictic interval in Paramecium aurelia, 235.
Potassium ions, effect on volume changes in Amoeba, 297.

REDFIELD, ALFRED C., AND ANCEL B. KEYS. The distribution of ammonia in the waters of the Gulf of Maine, 83.
Regeneration, factors governing rate of, in Tubularia, 155.
Reproduction, physiology of, in Ostrea virginica, 461.
Respiratory metabolism and temperature acclimatization in fishes, 403.
Retractor muscles, histology of, in Thyone briareus Lesueur, 342.

SABELLARIA vulgaris, embryonic determination, 198, 211.
SCHMIEDER, RUDOLF G. The sex ratio in Melittobia chalybii Ashmead, gametogenesis and cleavage in females and in haploid males (Hymenoptera: Chalcidoidea), 256.
Sergestidae, eyes of, 364.
Sex, phases, in oviparous oyster, 64.
——, ratio, in Melittobia chalybii Ashmead, 256.
Sodium ions, effect on volume changes in Amoeba, 297.
SONNEBORN, T. M. The delayed occurrence and total omission of endomixis in selected lines of Paramecium aurelia, 76.
SPEICHER, KATHRYN G., AND B. R. SPEICHER. Diploids from unfertilized eggs in Habrobracon, 247.
STILES, KARL A. Intermediate-winged aphids and the time-of-determination theory, 430.
SUMMERS, F. M. Some aspects of normal development in the colonial ciliate Zoothamnium alternans, 117.
——, ——. Form regulation in Zoothamnium alternans, 130.
SUMNER, F. B., AND P. DOUDOROFF Some experiments upon temperature acclimatization and respiratory metabolism in fishes, 403.

TEMPERATURE acclimatization and respiratory metabolism in fishes, 403.
Thyone briareus Lesueur, histology of retractor muscles, 342.
Time-of-determination theory and intermediate-winged aphids, 430.
Trematode, life history of, from shore birds Limosa fedoa and Catoptrophorus semi-palmatus inornatus, 319.
Tubularia, regeneration rate, factors governing, 155.
TYLER, ALBERT. *See* Morgan and Tyler, 401.
——, —— AND N. H. HOROWITZ. On the energetics of differentiation, VII, 99.

VARTIOVAARA, UNTO. *See* Waksman and Vartiovaara, 56.
Volume changes in Amoeba proteus, as affected by various salts, 297.

WAKSMAN, SELMAN A., AND UNTO VARTIOVAARA. The adsorption of bacteria by marine bottom, 56.
WELSH, J. H., AND F. A. CHACE, JR. Eyes of deep-sea crustaceans, II. Sergestidae, 364.

X-RADIATION, and inactivation of sperm in Habrobracon, 253.

YOUNG, R. T. The life history of a trematode (Levinseniella cruzi?) from the shore birds (Limosa fedoa and Catoptrophorus semipalmatus inornatus), 319.

ZOOTHAMNIUM alternans, normal development and form regulation, 117, 130.
